

Capabilities Statement

Silicon Networks Group LLC
(775) 945-9825

Silicon Networks Group History on YouTube:
<https://www.youtube.com/watch?v=XXBPcxQvldQ>

Core Competencies: Network Engineering with the Internet of Things: Internet Service Anywhere Anytime; Service for locomotives, remote fire stations, highway signs, industrial trailers, heavy equipment, service vehicles, and drones. IBM Business Partner since 2001. Silicon Networks Group can provide internet technologies, local and wide area networking. Silicon Networks Group provides IBM and Lenovo computers on the GSA Schedule and for the Enterprise.

Differentiators: Silicon Networks Group LLC can deliver cloud solutions with Lenovo workstations in a timely fashion. Silicon Networks Group provides solutions to complex business problems. We can provide a network in a box with server(s), workstations, routers all preconfigured and shipped labeled for a working network out of the box. We can provide Lenovo products refurbished or new, with true plug and play compatibility.

Past Performance: Since 2001, Silicon Networks Group LLC has provided the best in class networking services: Wide Area Networking, Local Area Networking, Wireless Networking, and 5G T-Mobile Enterprise Networking. 5G is the foundation for Silicon Networks Group LLC IoT offerings for providing Ethernet Connectivity to moving trains, wireless controllers for climate control on loaded container ships; logistics for warehouse management systems; public information solutions for the National Park Service for remote visitor centers. If you need moving wireless Internet Service, we have the solution for Rural America. We can ship networking equipment anywhere in the lower 48 states, from major suppliers such as HP, IBM, Symbol, and Zebra. Engineers are IBM and Microsoft trained.
